EVERYWHERE.**

About us

Bartes LTD was established in 2016 and proposes logistics solutions "tailor-made" in order to meet the demands of customers, carrying in road mode, train and naval, with maximum efficiency and safety a wide range of chemical products, as well as liquid industrial waste also classified as hazardous.

A continuous path of progress has always been the sign of the innovation of the processes . Bartes is highly vocated to the Internationalisation and thanks to a high level of quality service , our company is a guarantee in the chemical transport world.

Our business concept is based on flexibility and innovation. These factors guarantee the continuity of our company.

That's why we concentrate on doing whatever is possible – being a modern logistics. The main activity of the company is the transportation of a wide range of chemical products as well as liquid industrial waste, classified as hazardous.

Company policy is aimed at maintaining and expanding the scope of activities in order to gain customer confidence, to maintain and improve the material and technical base and competence of the staff and to provide the financial resources necessary to achieve the goals of this policy.

Our Fleet

The road tractor fleet is monitored by a satellite control system, integrated with a management information system to provide customers with an update in real-time of the status of their shipments.

Furthermore, our GPS system is integrated with our management software; in this way, it is possible both the constant monitoring and control of the movements of the vehicles, and the monitoring of the routes with possibility of intervention of emergencies 24 hours.

Our company fleet is 40 tractors , which are changed every 3-5 years , in order to guarantee high quality level of services.

Road Tankers

The fleet of road tankers respond with flexibility to market needs by adapting to the Transport of different products, from solvents, additives for cement to highly viscous products, thanks to air compressors, flow pumps and flowmeters.

SWAP BODY

Stainless steel insulated - 34,000 liters - with baffles . authorized the transport of dangerous chemicals classified in Class 3 -4.1 - 6.1 - 8-9. Extremely versatile, it can carry many different types of chemicals and travel either by road, rail and via ship.

Road Tankers

One section ROAD TANK

Stainless steel insulated tank - authorized the transport of dangerous chemical products classified in Classes 3-4.1 - 6.1 - 8 - 9 - Liter Capacity 37,500. Equipped with internal bulkheads for shipments of small quantities of hazardous products.

Road Tankers

Two section ROAD TANK

Stainless steel tank insulated authorized to transport hazardous chemicals classified in Classes 3-4.1 - 6.1 - 8 - 9 - provided with n. 3 rooms in the following capacities: 7400 - 22000-7400 and internal bulkheads (the compartment lt. 22,000) for the shipment of small quantities of hazardous products.

Road Tankers

Three ROAD TANK

Stainless steel tank insulated authorized to transport hazardous chemicals classified in Classes 3-4.1 - 6.1 - 8 - 9 - provided with n. 3 rooms in the following capacities: 7400 - 22000-7400 and internal bulkheads (the compartment lt. 22,000) for the shipment of small quantities of hazardous products.

Road Tankers

Four section ROAD TANK

Stainless steel tank insulated authorized to transport hazardous chemicals classified in Classes 3-4.1 - 6.1 - 8 - 9 - provided with n. 4 rooms in the following capacities: 10 000 - 5000-8000-10 000 for the shipment of small quantities of lubricants and other small shipments.
